CONTI® SCOOTER XT V-belts

Full power for cool riding pleasure

CONTI® SCOOTER XT

In original equipment quality

With our innovative drive solutions we are a development partner and original equipment supplier to the automotive and other key industries. We offer a heavy-duty V-belt specially developed for the main drive on motor scooters – the CONTI® SCOOTER XT.

Potent advantage: Material compound and design

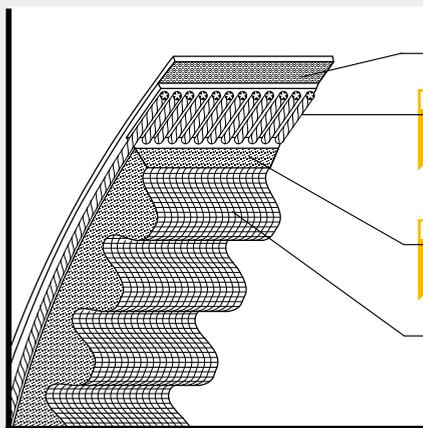

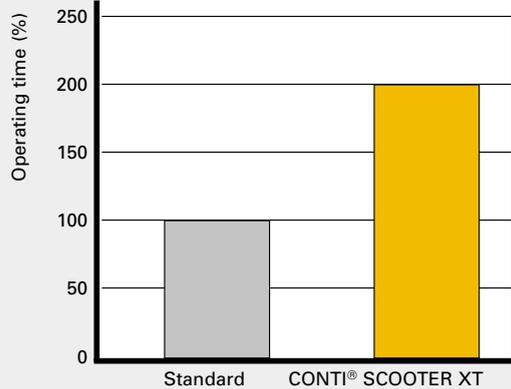

For the CONTI® SCOOTER XT we went back to the drawing boards and came up with a new compound and design that works wonders in many variator drive applications. The compound and tension member quality is every bit as high as for original equipment. In addition to the improvements made in the material, the newly developed belt toothing, which is optimally mated to the drive geometry, ensures enhanced efficiency. Power is reliably transmitted, even at high gear rate.

Strong advantage: Glass cord tension member

The glass cord tension member supports the enormous performance capability of the CONTI® SCOOTER XT and ensures long service.

Service life CONTI® SCOOTER XT

Construction:	Features:
Cover fabric	● wear resistance
NEW glass cord tension member	● high resistance to tear ● very good longitudinal stability ● good temperature stability ● good dynamic features
NEW Polychloroprene rubber compound	● very good wear resistance ● high dynamic strength
Polyamide fabric	● high flexibility ● enhanced tooth strength
